

Appendix G.7 Teacher Feedback Email Questionnaire

I have just 5 questions... Please answer them honestly and give examples if possible.

- 1) Was the content of the Assembly & Workshop* at a level which could be understood by most pupils and did it relate to their curriculum learning?

- 2) Have you referred back to any of the ideas or activities during the course of your teaching this year?

- 3) Do you think the Assembly & Workshop* had any impact on your pupils' interest in science or their enthusiasm for the subject? (This could be positive or negative, on the whole class or individual pupils.)

- 4) Has this effect (if any) lasted throughout the term/school year?

- 5) Are there any ways we could improve the Assembly or Workshop*? (e.g. content, format, pre/post event organisation etc.)

Any other comments...

😊 Many thanks for taking the time to think about this

* As applicable in the individual emails
